Title : IMPLEMENTASI KEAMANAN JARINGAN
INTERNET BERBASIS MIKROTIK DENGAN METODE *BLOCKING WEB
PROXY* DI HOLLATEAM.ID

With existing technological advances, technology has an important role in technological excellence which is developing very rapidly, namely having a security system, especially on internet networks where there are often many sites or web browsers that contain negative content, especially in the form of videos, which web makers often manipulate. The website is like streaming movies but inside it contains negative elements such as adult movies, and even websites or online gambling sites that are advertised. In this study a security system was designed using an internet network based on Mikrotik and designed using a web proxy system method in the internet network on Mikrotik to limit internet service users from accessing web pages that contain negative content.

Keywords : Internet Network Security , Mictotic, Web Proxy
