Judul : Hubungan Tingkat Pengetahuan dan Sikap Terhadap Perilaku Masyarakat Tentang Pandemi Virus Corona di Desa Samperaya Kecamatan Bahorok Provinsi Sumatera Utara.

Penyakit virus corona 2019 (COVID-19) adalah penyakit yang disebabkan oleh SARS –CoV-2 yang baru-baru ini telah menjadi pandemi di seluruh negara terutama Indonesia. Pandemi virus corona telah menjadi tantangan baru di kesehatan. Masyarakat Indonesia mengadopsi langkah-langkah pencegahan dan pengendalian penyebaran virus corona. Kepatuhan masyarakat untuk mengendalikan tindakan dipengaruhi oleh pengetahuan, sikap dan perilaku masyarakat terhadap virus corona. Dalam studi ini, peneliti ingin menyelidiki pengetahuan, sikap dan perilaku masyarakat di desa Samperaya terhadap virus corona selama pandemi masih berlangsung di Indonesia khususnya Sumatera Utara yang priode kenaikan kasus positif meningkat dengan cepat. Penelitian ini merupakan penelitian observasional dengan rancangan penelitian cross sectional yang bersifat deksriptif. Jumlah sampel sebanyak 350 masyarakat. Teknik pengambilan sampel pada penelitian ini menggunakan perpositive sampling. Pengumpulan data diperoleh melalui lembar kuesioner dengan pertanyaan tertutup. Hasil penelitian menunjukkan tingkat pengetahuan ,sikap dan perilaku masyarakat tentang pandemi virus corona mayoritas berkategori baik dan terdapat hubungan antara tingkat pengetahuan dengan sikap terhadap perilaku masyarakat tentang pandemi virus corona di desa Samperaya. Kesimpulan penelitian ini masyarakat desa Samperaya memiliki pengetahuan , sikap dan perilaku yang baik terhadap pandemi virus corona yang sedang terjadi. Ini sangat mendukung dalam pengendalian pandemi virus corona di Sumatera Utara.

Title : The relationship between the level of knowledge and attitudes
Towards community behavior about the corona virus in
Samperaya Village Bahorok North Sumatera province.

Corona 2019 virus is a disease caused by SARS – CoV-2 which has recently become a pandemic for countries across the globe, most especially Indonesia. The pandemic has become a new challenge for the health sector. Indonesia has adopted measures to prevent and control the spread of corona virus. Community compliance to control measures is influenced by the people's knowledge, attitudes and behaviour regarding corona virus. In this study, the researcher seeks to investigate the knowledge, attitudes and behavior of Smpereya Village's inhabitants towards corona virus while the outbreak is still occurring in Indonesia, particularly in North Sumatera, where there has been a rapid increase in positive cases. This research is an observational research using descriptive cross-sectional research design. Samples number as many as 350 participants. The sampling technique deployed here is purposive sampling. Data is collected using questionnaires with closed-ended questions. The results show that the majority level of knowledge, attitude, and behavior about Corona virus can be categorized as "good" and there is indeed a correlation between attitude and behavior displayed by the people towards the corona virus. In conclusion, the residents of Samperaya village has a good level of knowledge, attitude, and behaviour about the ongoing Corona virus pandemic. These results are very supportive in further efforts of controlling the widespread of the Corona virus in North Sumatera
