Judul : Analisis Biaya Pengobatan Penyakit Gagal Ginjal Kronis Rawat Inap dengan Hemodialisis Pada Pasien BPJS di RSUP Fatmawati Periode Januari-Juni 2017

Penyakit ginjal kronis yaitu kerusakan ginjal atau GFR kurang dari 60 mL/menit/1,73 m² selama lebih dari tiga bulan. Tujuan penelitian ini untuk mengetahui demografi pasien, gambaran pengobatan, serta total rata-rata biaya langsung yang dikeluarkan pasien penyakit gagal ginjal kronis yang menjalani rawat inap dengan hemodialisis di RSUP Fatmawati. Penelitian yang dilakukan merupakan penelitian deskriptif dengan pendekatan retrospektif. Hasil penelitian yaitu pasien laki-laki (55,32%), perempuan (44,68%), usia 41-50 tahun (34,04%), rata-rata LOS 12 hari. Obat yang paling banyak digunakan yaitu Vitamin & mineral dan Antihipertensi. Total biaya rata-rata medis langsung tertinggi kelas I dan II Rp. 554.166,67 dan Rp. 450.260,42 dipengaruhi oleh biaya ruang rawat inap, serta kelas III Rp. 265.421,93 dipengaruhi oleh biaya obat & alkes.

Kata kunci:

Analisis biaya, penyakit gagal ginjal kronis, rawat inap, hemodialisis.
