Program Studi : Farmasi
Judul : Tingkat Pengetahuan dan Sikap Terhadap Penggunaan Suplemen Vitamin dimasa Pandemi Covid-19 pada Masyarakat RW.09 Kelurahan Srengseng Sawah Kecamatan Jagakarsa Jakarta Selatan.

Penyakit Coronavirus (COVID-19) adalah penyakit menular yang ditimbulkan oleh virus SARS-CoV-2. Penyebaran Covid-19 dapat dikendalikan dengan cara mengkonsumsi suplemen serta vitamin agar tubuh tetap terjaga dan selalu sehat. tingkat pengetahuan warga terhadap penggunaan suplemen vitamin selama masa pandemi covid-19 akan sangat berpengaruh terhadap sikap seorang dalam menjaga serta meningkatkan imunitas tubuh. Tujuan Penelitian ini untuk mengetahui hubungan tingkat pengetahuan terhadap sikap dalam penggunaan suplemen vitamin di masyarakat RW.09 Kelurahan Srengseng Sawah. Metode: Desain penelitian ini adalah *cross sectional* dengan jenis penelitian deskriptif analisis menggunakan kuesioner sebagai instrumen pengumpulan data yang telah diuji validitas dan reliabilitasnya, analisis data dihitung menggunakan perhitungan SPSS. hasil: Hasil analisis diperoleh data pada 97 responden diketahui bahwa karakteristik responden perempuan lebih banyak 52,6% dibandingkan laki-laki, berdasarkan usia, remaja akhir 39,2% lebih banyak dari jumlah responden lain, tingkat pendidikan S1 lebih banyak 57,7%. 97 responden 100% memiliki sikap yang positif dan memiliki pengetahuan yang baik 88,7% serta 11,3% berpengetahuan cukup. Pengetahuan terhadap sikap penggunaan suplemen vitamin masyarakat RW.09 Kelurahan Srengseng Sawah diuji memakai uji alternatif Chi-Square yaitu uji Fisher's $p \text{ value} = 0,225 > \alpha = 0,05$ menyatakan tidak adanya hubungan antara tingkat pengetahuan terhadap sikap. Dimana H_0 ditolak dan H_a diterima dengan nilai $r \text{ tabel}$ lebih kecil asal $r \text{ hitung}$.

Title : Level of Knowledge and Attitude towards the Use of Vitamin Supplements during the Covid-19 Pandemic in the Community of RW.09, Srengseng Sawah Village, Jagakarsa District, South Jakarta.

Coronavirus disease (COVID-19) is an infectious disease caused by the SARS-CoV-2 virus. The spread of Covid-19 can be controlled by taking supplements and vitamins to keep the body awake and always healthy. The level of knowledge of citizens on the use of vitamin supplements during the COVID-19 pandemic will greatly affect a person's attitude in maintaining and increasing body immunity. The purpose of this study was to determine the relationship between the level of knowledge and attitudes in the use of vitamin supplements in the community of RW.09, Srengseng Sawah Village. Methods: The design of this research is cross sectional with descriptive analysis type using a questionnaire as a data collection instrument that has been tested for validity and reliability, data analysis is calculated using SPSS calculations. Results: The results of the analysis obtained data on 97 respondents, it is known that the characteristics of female respondents are 52.6% more than male, based on age, late teens 39.2% more than the number of other respondents, S1 education level is 57.7% . 97 respondents 100% have a positive attitude and have good knowledge 88.7% and 11.3% have sufficient knowledge. Knowledge of the attitude of using vitamin supplements in the community of RW.09, Srengseng Sawah Village, was tested using the Chi-Square alternative test, namely the Fisher's test $p \text{ value} = 0.225 > 0.05$ which stated that there was no relationship between the level of knowledge and attitudes. Where H_0 is rejected and H_a is accepted with a smaller r table value from r count.
